

Large Circular Picnic Table  
LCPT

## Large Circular Picnic Table and Rectangular 'A' Frame Picnic Table

We have added 2 new Heavy Duty Picnic Tables to our range this year. Both tables are constructed from 45mm timber which makes them ideally suitable for commercial use as well as in domestic gardens. These are very solid pieces of furniture as well as being extremely durable. Our new circular picnic table has 8 seats designed for easy access - the space between the seats allowing for extra seating to be added if required as well as giving access for wheelchairs. Our 'A' frame table uses the same tried and tested design of our existing rectangular table with seating for 6. The use of 45mm softwood makes this product considerably more robust than any of its competitors.

## Raised Bed Kits

Our Raised Bed Kits have been introduced for the grow your own market. Produced from 38mm softwood, they use a slot down construction for easy assembly and are also given Class 4 pressure treatment. This gives the product a 15 year expected life even in harsh damp conditions.
