Hutton Garden Products is a division of Severn Valley Woodworks Ltd

HOW TO USE THE HUTTON COMPOST BIN:

1. For best results site your compost bin in a semi-shaded position.
2. Add material in layers of approx. 150mm (6").
3. Make use of a variety of garden and household waste materials.
4. Avoid perennial weed roots, weeds that have gone to seed and any diseased plants.
5. If possible chop woody material into small pieces approx. 50mm (2") long.
6. Mix in a compost activator and garden soil - particularly with woody material.
7. Turn compost regularly (every 3 - 4 weeks).
8. Try to keep compost evenly moist.

WHEN THE COMPOST BIN IS FULL:

As the compost matures and settles, the slatted sections can easily be removed row by row and replaced alongside the existing bin to start a new heap with fresh material.

Special extension packs consisting of 8 full slats are available for both sizes of bin to allow an increase in volume of an existing compost bin or to give a greater start to a second bin.
