WHY CHOOSE A HUTTON TIMBER GARDEN SHED

- **Timber:** Manufactured using slow grown joinery grade Scandinavian Redwood, to ensure an attractive and high quality finish. All timber is sourced from sustainable forests.
- **Treatment:** Pressure treated with Tanalith® E, a leading brand wood preservative.
- **Framework:** Strong Ex 38mm x 50mm timber for maximum stability and support.
- **Floor & Roof:** Ex 25mm thick Tongue & Groove for added strength and durability.
- **Cladding:** Ex 19mm Shiplap, this is thicker than most claddings used in domestic sheds and makes the structure more robust.
- **Fixings:** Stainless steel fixings and heavy-duty galvanised ironmongery that are reliable in all weather conditions.
- **Warranty:** 15-year TREATED-RIGHT Performance Warranty* against wood decay and insect attack.
- **Privacy Option:** Looking for added security or privacy? All shed models are available with a no-window option.

 Please note: Nominal sizes of softwood shown are before the material has been profiled to section.

Tips & Advice

CARING FOR YOUR HUTTON TIMBER GARDEN SHED

All Hutton Garden Products, where appropriate, come with easy to follow instructions. Please take time to read these carefully before assembling.

Hutton Garden Products are built to last with high quality timber to refined designs. Joinery standards are second to none with professional carpenters using pressure treated softwood that offers long-lasting protection against wood decay and insect attack.

Although the Tanalith® E wood preservative used in the pressure treatment process is of the highest quality, it doesn't protect timber from the effects of weather. Without additional protection UV rays from the sun will weather timber changing the colour to silvery grey. Moisture will negatively affect the lifespan and performance of a timber product, so it's essential to add a high quality protective water-repellent coating to your Hutton Garden Product.

For tips and advice for getting the best out of your product visit the **Product Care** page on the Hutton Garden Products website -

www.huttongardenproducts.co.uk

Water Repellency

The pressure preservative treated timbers used in Hutton sheds are protected against wood decay and insect attack to give a long and low maintenance service life. The treatment is not intended to perform as a water repellent.

If you require protection against water ingress, we suggest the use of an appropriate and well maintained exterior coating which should be applied to the dry external timbers following the relevant manufacturer's guidelines.

Shed Bases

For best performance, sheds must be installed on bearers treated to Use Class 4 (suitable for ground contact). If positioning directly onto a concrete base, adequate drainage is essential to prevent standing water.

6' x 4' Apex Shed

Take a look at the Hutton 6' x 4' Apex Shed, a compact storage option and built to last. The cladding features an extended rebate. The 6' x 4' Apex shed is fitted with a window as standard to allow natural light to enter and includes all ironmongery as shown in the image.

Also available with a no-window option if extra security or privacy is preferred.

Code: **APEX64**

Dimensions:

Height: 2100mm

Width: 1220mm

Depth: 1825mm

Weight: 240kg

8' x 6' Apex Shed

Introducing the Hutton 8' x 6' Apex Shed, a great sized storage option that can cater for all needs. The floor and roof sections are produced using ex 25mm thick Tongue & Groove which adds strength and durability highlighting this really as a premium quality Apex Shed.
